

ILAFLON Select PR

ILAFLON Select PR is a single-layer easy-to-clean system with good dishwasher compatibility.

- System for easy application and use
- Excellent corrosion protection
- Good cleanability

Properties

Number of layers	1
Coating thickness	20 - 25 µm / 0.79 - 0.98 mils
Curing temperature to approx	250 °C / 482 °F
Service temperature	150 °C / 302 °F

Application

Application	
Can opener	Not suitable
Garlic press	Not suitable
Corkscrew	Not suitable
Meat tenderizer	Not suitable
Nutcracker	Not suitable
Ice cream scoop	Not suitable
Rolling pin	Not suitable
Defrosting plate	Not suitable
Household knife	Not suitable
Fruit basked	Not suitable
Splash cover	✓ ✓ ✓

Substrate

Substrate	Pre-treatment	Suitability
drawn aluminum	alkaline degrease	✓ ✓ ✓
alu cast	alkaline degrease	✓ ✓ ✓
aluminized steel	alkaline degrease	✓ ✓ ✓
carbon steel	phosphating	✓ ✓ ✓
stainless steel	degrease & sandblasting with corundum	✓ ✓ ✓

Cleaning and care instructions

After use, clean the kitchen utensil with hot water, a mild washing-up liquid and a sponge cloth or the fine side of a dishwashing sponge. A soft dishwashing brush can also be used for cleaning. If used only occasionally, wiping with a damp cloth is sufficient.

Stubborn food residues should never be cleaned with a metal sponge or the sharp side of a dishwashing sponge. Poorly cleaned items significantly reduce the non-stick effect and destroy the coating.

The product can be cleaned in the dishwasher, although this is not recommended due to the aggressive cleaning agents. Cleaning by hand is preferable.

Instructions for use

Before using for the first time, remove the packaging, labels and all stickers and clean the product with hot water and washing-up liquid.

Kitchen utensils are always designed for cold use.

Longevity

All coatings are sensitive to scratches and cuts. Small scratches are visible, but do not impair the properties. Nevertheless, we do not recommend the use of metal cutlery and other sharp objects.

Temperature stability

Coatings for kitchen utensils are temperature-stable, but it is not advisable to place them on the hob or in the oven.
