

ILAFロン® Resist SP-800 PFAS-free is characterized by strong performance, a wide range of uses and a broad range of colors.**

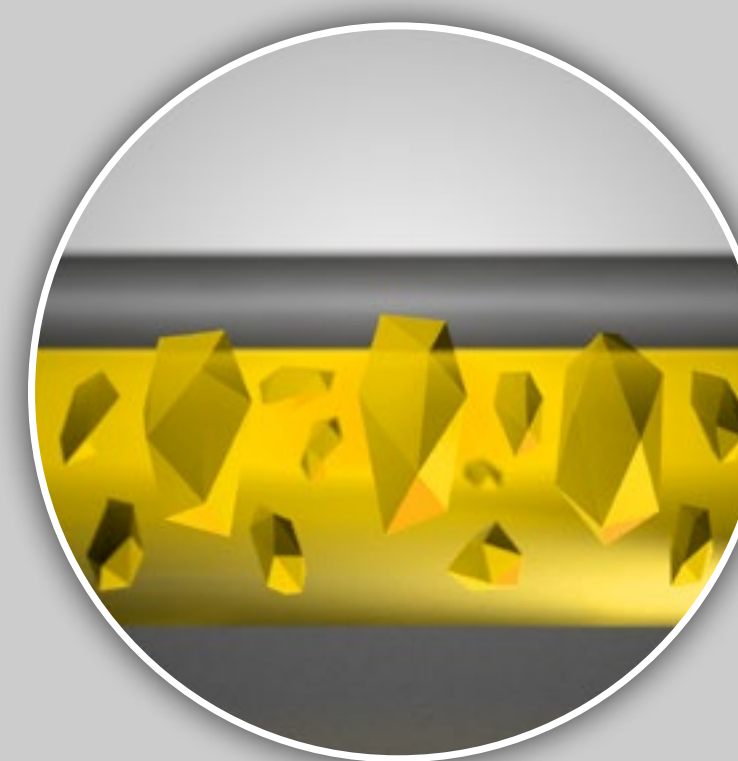

- Top-end solution for demanding baking and roasting
- Our talent for all casserole dishes
- 2-layer system with very good non-stick effect and exceptionally stain resistance
- Excellent corrosion resistance and guaranteed dishwasher safe
- Thanks to very high surface hardness, resistant to scratches
- PFAS- and PTFE-free technology

**Available for the EU area with Swiss Shield technology.

- ① Scratch-resistant surface sealing with the best non-stick properties
- ② Ceramic reinforced base coat

ILAFLO[®] Resist SP-800 PFAS-free is a ceramic-reinforced product with an excellent non-stick effect. This product meets all the requirements for top-level baking, grilling and casserole dishes.

| Characteristics | |
|-----------------------------|---|
| Quality level for consumers | ★★★★ |
| Basis | Silicone polyester |
| Number of layers | 2 |
| Coating thickness μm [mils] | 20 - 25 [0.78 – 0.98] |
| Curing temperature °C [°F] | 280 [536] |
| Color variety | various color options feasible except for pastel colors |
| Substrates | phosphated steel, aluminized steel |

| Performance profile | |
|--|-------|
| Abrasion resistance (BS) | ★★★ |
| Non-stick effect (baking test) | ★★★★★ |
| Stain resistance (chicken test) | ★★★ |
| Dishwasher resistance phosphated steel | ★★ |
| Dishwasher resistance aluminized steel | ★★★★★ |

| Application | |
